Rescission of Technical Guidance #TG98-004

Date: December 22, 1999

Rule: 345 as adopted 11/20/96

The Technical Guidance document TG98-004 is hereby rescinded.

Discussion: TG98-004 was created in 1998 by the Rules Clarification Committee to interpret and amplify parts of Section 305 in the 1996 version of Rule 345. TG98-004 describes in adequate detail when use of a spray-gun cleaning-machine is not required, thereby remedying the incompleteness of such description in the 1996 version. The current version of Rule 345 (adopted 4/21/99) both supersedes the 1996 version and eliminates the need for TG98-004 by completely describing when a gun-cleaning machine is not required.

signed 12/22/99

Steven E. Peplau, Manager
Air Quality Division
